The INTRODUCTION.

When Great George came, affrighted sneak'd away
The *Romish* Foxes, and such Beasts of Prey;
Their Blood grew chill within their treacherous Veins,
For fear their Necks should 'tune for our designed
Like *Joab's* Friendship to *Amasa's* Face, (Chains.
Usthey have stab'd and our Allies with Peace:
But now we see Great George he does retrieve,
Our *British* Glory, and our State relieve.
May that kind Providence which brought him here,
Be still his Guard, and in all Dangers near,
Advance his Royal Race to tread upon
The Viper's Neck, and crush the Scorpion;
And you, brave Prince *Augustus*, may your Fame
Rise higher than Great *Cesar's* of that Name;
Your early warlike Valour did foretel,
You should be great in *British* Israel.
Famous at *Oudenard* for Feats of War,
Where hand to hand you charg'd the *Chevalier*;
Ramillies shall your lasting Glory yield,
Where you gain'd Wreaths of Lawrel from the Field;
The Battle Field, which of your Foes will say,
How thick they fell how fast they run away;
You shar'd in Glory with Great *Marlborough*,
And gather'd Heaps of Standards from the Foe.
May you and yours, Great Sir, ' successively reign o'er
These happy Isles, 'till Time shall be no more.

Which are the cordial Wishes of all Protestants, and
true Sons of the Church.

Great is the Name of King, and full of Splendor,
Great, Good and Just is our great Faith's Defender;
May he live long, his Enemies to quell,
And Honour those who have deserved well.
As Age comes on, Lord, let his Joys encrease,
And keep us in continual Peace:
So having long his Earthly Crown enjoy'd,
And by his loving Subjects been obey'd,
Let him at length enjoy a Heavenly Crown,
Where Saints and Angels sit in high Renown.

Plots upon Plots, makes the Jesuits smile,
Who do think our Nation, at last to beguile;
Divisions grow rife, and Seditions begin,
Whilst the Tories do clamour and rail at the Sin,
Which themselves have contriv'd, for here it is plain,
Their Aim is to have the Pretender to reign.

Then shall France nor Spain, no more dare to frown,
 Left our bold Armies should take their Pride down;
 We conquering Ensigns to Rome might extend,
 If each Man was faithful, and true to his Friend;
 There to unhive the old Pope, and his Crew,
 And lead them in Triumph, brave London to view.

London, in particular, is like to be a
 sharer in the Effects of the foregoing
 Solar Eclipse, for that it is in Gemini,
 the Ascendant of London, and Mercury,
 Lord thereof, is a Lord of the Tenth
 House, and in his own Domal Dignities,
 and in Trine to Jupiter, which therefore
 signifies much Subtilty, and a quick
 Dispatch of whatsoever Matters may be
 now in Controversy. Now many up-
 right and just Judges are very active for
 the publick Good; now Customs or Pri-
 vileges are most happily conferred up-
 on the People in General.

And wish that once more they could see it flame;
But in vain they might wish, if once we agree,
To support the great Throne of true Majesty;
To subdue all our Foes, as oft we have done,
When by strict Union, the Nation was one.

Astrological Observations.

The 3d, 4th, and 5th of this Month 1666, was **LONDON BURN'T** by those Vile Incendiaries, the Papists. Therefore ought we to let the Remembrance of **SIXTY SIX** be engraven in indelible Characters, on the Hearts of Posterity, to make them abhor Popery, and detest such vile Incendiaries. Let it remain a Monument of Gratitude to God, of Caution to England, and of Shame to Rome.

If you would know the Interest of One Hundred Pounds for
Month, two Months, three Months, six Months, nine Months, or
Year; look for 100 l. in the Side, and in the next Column under
Month is Eight Shillings and Four Pence; for 2 Months 16 s. 8 d.
; Months 1 l. 5 s. for 6 Months 2 l. 10 s. for 9 Months 3 l. 10 s.
and for a Year Five Pounds; and so of the rest.

*This is the honest way by which Men should
To Interest let their Silver and their Gold,
Yet worldly Misers, when to raking fall,
They, with their Interest, get the Devil and all.*

Observations on the Four Quarters of the year, and first, of the Winter.

WHICH takes its beginning at such time as this Terrene Star toucheth the first point of the Cœlestial Crab, or Sign *Cancer*; or that glorious Lamp of Heaven the Sun, both enter the first Scruple of *Capricorn*, or the Cœlestial Goat, which happened on *December* the 11th, 1723. at 9 minutes past 7 in the Morning; at which time 24 deg. 6 min. of *Sagittarius* ascends in the Latitude of *London*, and 29 deg. 15 min. of *Libra* is upon the Cusp of the 10th House; the *Moon* is upon the Cusp of the 10th House, in exact Trine to *Mars* in the 7th. and in Sextile to the *Sun* in the 1st House; the *Sun*, *Saturn*, *Jupiter* and *Venus* are in the Ascendant, and *Mercury* near the Cusp thereof; thus we see at this *Winter* Ingress the Planets are all angular, and in (or near entering into) Cardinal Signs, and *Mars* in Opposition to ☉: from which Positions we may conjecture that great and weighty Matters are now in agitation in most Parts of the World. *England*, *Scotland*, *Holland*, &c. are about this time concerned in some Hostile and Warlike Amusements; the Opposition of the *Sun* and *Mars* from (the first point of *Capricorn* and *Cancer*) Cardinal Signs, and posited in Cardinal Houses also, aptly denotes many Mischiefs and Misfortunes to befall some great military Men, and Seditions and Controversies amongst the noble Men; the old Year ends with a Conjunction of *Sol*, *Jupiter* and *Mercury* in *Capricorn*, signifying great Damages, and Death of noble Men, War and Dissentions amongst the great ones; tempestuous Weather, and many Inundations.

Of the Spring Quarter.

THE Spring Quarter commenceth at such time as the Earth touches *Libra*, or bright *Phebus* mounts the first point of the Cœlestial Ram or Sign *Aries*, making Days and Nights of equal Length, and happens this year on *March* the 9th Day, 40 min. 11 sec. past 9 in the Morning, according to the Tables in *Scientia Stellarum*, at which time 28 deg. 15 min. of *Gemini* ascends, and 22 deg.

22 deg, 34 min. of *Aquarius* Culminates, the *Moon* is in the 8th House in 27 degrees and a half of *Capricorn*, a departing from the Conjunction of *Saturn*, and applying to the Square of *Venus*, and Conjunction of *Jupiter*, *Saturn* is in the 7th House in Trine to *Venus* and in Sextile to *Mercury*, and in Opposition to *Mars* who is located in the Ascendant, and in Square to the *Sun*, in Sextile to *Venus*, and in Trine to *Mercury*: *Jupiter* is upon the Cusp of the 9th House in Square to *Venus*, and in Sextile to the *Sun*, and thus is the Heavens posited at this Solar Ingress: from which I gather, Men will be various in their Thoughts and Actions concerning the grand Affairs of the World. The two Fortunes *Jupiter* and *Venus* being in Square to each other, and the two grand Infortunes *Saturn* and *Mars*, in Opposition to each other, and *Mars* being in Square to the *Sun*, and *Venus* in Square to the *Moon* in *Capricorn*, the place of her Determent, are all very malevolent Positions; and such as presages Dissentions, Quarrels, Wars, and Commotions in the Elementary World, *Holland*, *Scotland*, *Saxony*, &c. will too soon feel the Effects of the foregoing Radiations; the *Muscovite* acts their Parts in the general Transactions of the Year, and the Time seems to be now approaching which was long since predicted by *Sibylla Tibertina*, a Prophecy found in the Year 1520, in the Bowels of a Mountain in *Switzerland*; after a great Inundation of Waters, which broke down part of that Mountain, and left discover'd in the Ruins a Prophecy, the English of which is as follows:

A Prophecy.

A Star shall arise in *Europe*, over the *Iberians* toward the great House of the North; whose Beams shall unexpectedly enlighten the whole World: This shall be in a most desired Time; when Mortals wearied with War shall unanimously desire Peace; they shall strive indeed by Occasion of a long lasting *Interregnum*, with various Studies, which shall obtain the Reigns of Empire, but at last the Offspring of the ancient Blood shall overcome, and proceed victoriously by force of Arms, until resisted by contrary Fates; for about the same time this Star being

another coeval Light blazing with more ardent Flames of War, shall spread his Empire even to the Coast of the Antipodes. But first *France* shall submit her Neck to his Yoke; and *Brittany* suppliant in Ships, shall cast herself at his Feet. *Italy* faintly breathing towards Scepters so high, shall stretch out to him her languishing Hand, but this bright beam before his time, shall with the vast desire of Men abscond himself in the Clouds of the Gods. VWho being extinct, after direful and bloody Comets and Flashings of Fire seen in the Heavens, there shall remain nothing for the future safe or healthy among Men. The Firmament of Heaven shall be dissolved, and the Planets be oppos'd in contrary Courses; the Spheres shall jostle one amongst another; and the fixt Stars move faster than the Planets; the Sea shall swell as high as the Mountains, and nothing remain but Night Destruction, Ruin, Damnation, and eternal Misery.

This Prophecy is taken Notice of by several good Authors, and in particular, by the famous and incomparably learned *Tycho Brache*, who thus expresses his Judgment of it. There was (saith he) divers Expositions of this Prophecy at the time when it was first found out; some interpreting it of *Charles V.* others of *Philip King of Spain*; and some thought the *French King* was meant thereby; but I think (saith he) it doth rather point out those *Iberi* who inhabit Northward towards *Muscovy*; so that this Oracle of *Sibylla Tiburtina* did not denote the Spaniards, but those Iberians which are near unto the *Muscovites*, especially when she useth these words over the *Iberians*, towards the Great House of the North. And truly *Muscovy*, *Scythia*, and *Tartaria* do make a great part of Europe; so that it may well be called the Great House of the North; (and saith the same Noble *Tycho*, in his Discourse on the New Star which appeared 1572) therefore since this unusual Star did cast its Perpendicular Beams and Influences on the Country of *Muscovy*, it is not to be doubted, but that this Star, together with that Tract of Land, doth agree with the *Sibylline Oracle*, and in the same Treatise having spoken of a glorious and happy Age to be in the end portended by that Star, and having started this Objection, that some might say, that the Light of the Gospel and Purity of Religion doth now shine out clearly, having already

ready overcome the Darkness of Papal Error. He answers in these words, "Whence is it then, if it were so, that so many Controversies and Varieties of Opinions are defended by Learned Men; insomuch that the Wars of Pens is more dangerous than that of Swords? Truly (saith he) it is rather to be feared, lest we take this Dawning and Break of Day for a clear Noon Light. Therefore I suppose that this Star doth signifie that there shall be a New Change both in Religion and the State of Humane Affairs; of which we may say,

Ventum ad Supremum est, patiuntur summa ruinam:

Qui Deus in Cælis regit, & reget omnia Terris.

We are now come to the highest Perfection, (the Power of Antichrist) and the Pope shall decay and be brought to ruine; and God who ruleth in Heaven shall also rule all Things on Earth". Thus far the words of that Great, Wise and judicious Astronomer *Ticho Brahe*.

Of the Summer Suarter.

WHich takes its Beginning at the Sun's Entrance into the Tropical Sign *Cancer*, which this Year is on June the 10th day, 45 min. past 9 in the Forenoon, and makes with us on this side the Equator the Longest Day, in the Figure 6 deg. of *Virgo* ascends, and 29 deg. of *Taurus* culminates, the Moon is in tenth House in 3 deg. 28 min. of *Cancer*, separating from the Conjunction of the Sun, and applying to the Opposition of *Saturn*, and Conjunction of *Mercury*; *Jupiter* is in the 6th House, and in the Sign *Aquaries*, in Opposition to *Mars* and *Venus* who are in Conjunction in the 12th House. These are all very threatening Positions, nor is there one good Aspect at this Ingress to meliorate the Evil signified by these more mischievous Ones: *Mars* and *Venus* are in *Leo* the Ascendant of *Italy*, *Rome*, &c. and beheld by the opposite Rays of *Jupiter*, who is retrograde in the 6th House. Certainly you Princes of *Italy*, as also the Roman Pontifex, or Conclave of Cardinals of the See of *Rome*, will all of you find great and most grievous Dislemper in your Persons and Governments near this time. A fiery Reformation seems now to be on Foot, and the time near at hand which was predicted by *Nostradamus* that

That famous Frenchman, viz. That Rome shall be ruled by the Brittannish Head, -- That the new Prince that joins the Lower and Northern Countries of Europe shall be the Instrument of Loss to the Church of Rome. --- That the Pope of Rome, together with his Clergy, except they shew themselves willing to be Reformed; shall be made to spit Blood, &c. or as another hath it,

*With headlong Speed, that Furniture doth advance,
Wherein the Royal Seat and State of France,
The Pope, Priests, Masses, Images, Saints, Shrines,
And what with these against Heavens Will combines,
By Divine Justice, shall to ruin fall,
I much mistake or some Angelical
Spirit these Verses did suggest,*

Of the Autumnal Quarter.

WHICH this Year commenceth on September the 17th day, 8 min. past 11 at Night, when 17 deg. of Cancer ascends, and 16 deg. of Pisces culminates, the Moon Lady of the Ascendant is in the 5th House, in the first deg. of Sagittarius, in Sextile to the Sun and Jupiter, from which I judge that the common People are for the generality very healthful, fortunate and happy; the Earth yieldeth her Fruit in great Plenty; the Air is very seasonable and pleasant, about the middle of this Quarter is the Moon Eclipsed, which falls in the 8th House of Heaven, in the Sign Taurus, in Opposition to Mars, and in square to Jupiter in Aquarius, the Opposite Sign to Romes Ascendant, which denotes Wars, Tumults, and Insurrections in Italy in general, and to the City of Rome in particular, which brings to my Remembrance the Passage of a Nameless Author in a Book printed 1650, where in pag. 9. Sect. 14. I find these words, speaking of the Judgments of God upon Europe, for neglecting the Overthrow of Antichrist, ruin of Rome, and Annihilation of the Sodomitical Order of the Society of Jesus, and in the Extirpation of all Kingdoms the free Estate of Papists, adhering to them to make way for the Lyon of the North to erect his fifth Monarchy in the Ashes of Germany, wherein shall be established the eternal Felicity of the Church, &c. If God in Judgment for our Sins should yet suffer Popery to increase and flourish, yet

yet it is certain the Joy of the wicked shall be but for a Moment, for we have a most sure word of Prophecy, that in due time Rome shall finally fall, and the Kings of the Earth shall hate the VVhore, and make her desolate and naked, and burn her with Fire, Rev. xvii. 16.

*Rome tottering long, laden with Errors store,
At last shall fall and head the World no more.*
